ABSTRACT:
Organization Description: Arizona Children's Association is a private, non-profit, statewide agency that has been delivering services since 1912. Over the past 94 years, Arizona Children's Association has developed an array of the highest quality child welfare and behavioral health services whose purpose is to address the needs of children and their families in all fifteen counties of the state. A number of multi-agency collaborations have been lead by Arizona Children's Association, in addition to their subcontracting work. New services are developed, which are consistent with Arizona Children's Association mission and which, whenever possible, are cutting edge and innovative.

Use(s) of ACF Program Grant Funds: The proposed projects aims to adapt the current Unified Curriculum and supportive materials to assure the availability, accuracy and non-directive delivery of adoption information and referrals by varying levels of health center staff. 420 training sessions will be implemented for designated staff in Arizona, Nevada and a new replication within New Mexico, over the five-year course. An annual conference curriculum will be developed and implemented for previous participants to receive a supplemental training in each of the three states. The impact of the Infant Adoption Awareness Training Program (IAATP) training will be evaluated on the ability of providers to utilize the knowledge and skills delivered in their particular work settings, as well as the impact on the ability of pregnant women to receive information and make informed decisions.
