ABSTRACT:
Organization Description: The Families' and Children's AIDS Network provides permanency planning services to ensure the future care and custody of children who are at risk of being orphaned by HIV/AIDS. These services have been funded by the Abandon Infants Assistance Program Family Options project since 1996.

Use(s) of ACF Program Grant Funds: Using a multidisciplinary approach, Families and Children's AIDS Network's Family Options project will provide direct legal and social work services to families who wish to make a future care and custody plan for their children. The new project enhancements will include peer outreach services, formalized consumer involvement, and technical assistance to downstate Illinois families and communities. Additionally, education and advocacy around HIV family policy will also be provided. The results and outcomes of the project will include improved permanency outcomes for HIV-affected children, deflection of causes from the child welfare system, increased family stability, and training materials on permanency planning and family support.
